

Chesterton International Polska  
Spółka z Ograniczoną Odpowiedzialnością

Gliwice, 22 maja 2020r.

### Confirmation of cooperation

With all conviction we can confirm a very successful cooperation with EMT-Systems Sp. z o.o.  
in the scope of raising the competences of our employees.

On November 25-27, a group of representatives of our branches from six countries (Norway, Turkey, Hungary, Sweden, Italy, Poland) took part in the training:

#### **H1: Construction and service of power hydraulics components and systems**

run entirely in English.

The EMT-SYSTEMS company has prepared and planned a closed training according to our needs  
and implemented the entire plan included in the training program.

Throughout the training, both - the trainer and the group supervisor were there to help. The individual approach, professionalism of the trainer and high substantive value of the course deserve special mention.

We highly recommend cooperation with EMT- Systems. In our opinion, this company remains a leader  
in technical training, focused on customer needs and fully competent to conduct technical courses  
in English.

It is a reliable and recommendable partner and provider of training services.

Wiceprezes Zarządu
